## ERASMUS+ KA 220-VET

Welcome to the first e-newsletter of the project UAVET.

### OUR AIMS

UAVET aims to support the training of maintenance, repair and technical service personnel who will work in drone technical services or after-sales services. Accordingly, UAVET focuses on increasing the quality of Vocational Education by contributing to setting occupational standards for drone repair and maintenance technician jobs and providing vocational training to 95 young people within vocational education schools or who graduated from vocational high schools.

### PROJECT RESULTS

- VET training program with a modular structure, covering the most common problems in electrical and mechanical systems, the software of UAVs
- Occupational Standards Guidebook, identifying which qualifications are required for drone repair and maintenance technicians
- Video library, including videos that show how to repair drones' different parts
- Digital handbook, giving information about UAVs, their parts and their repair and maintenance

# PARTNERS

Coordinator: Balıkesir University - The School of Civil Aviation (Türkiye)

Partner 1: Çanakkale Onsekiz Mart University (Türkiye)

Partner 2: DRONINT (Cyprus)

Partner 3: Traian Vuia Military School (Romania)

Partner 4: General Jan Henryk Dąbrowski Agricultural School Complex (Poland)

Partner 5: Mellis Ed-Tech

COMU Workshop

## WORKSHOPS

The first activity of the UAVET was local workshops to collect data. We invited drone company representatives, drone repair technicians, drone pilots, and VET trainers (mechatronic, aviation, and aircraft teachers), led the discussions, and received feedback at the end of the workshops. We came together with 8-15 participants in each local event.

The data we collected formed the basis of the Occupational Standards e-book as all participants worked together on the knowledge, skills and tools required for the tasks of a UAV repair and technician.

Workshop in BU

# KICK-OFF MEETING

At the meeting, the partners met in Edremit as the guests of The School of Civil Aviation at Balıkesir University.

They addressed various topics such as the overall evaluation of the project, individual partner presentations, revising responsibilities, collaboration on the OS E-BOOK and UAVET Training Programme, language translation and localization.

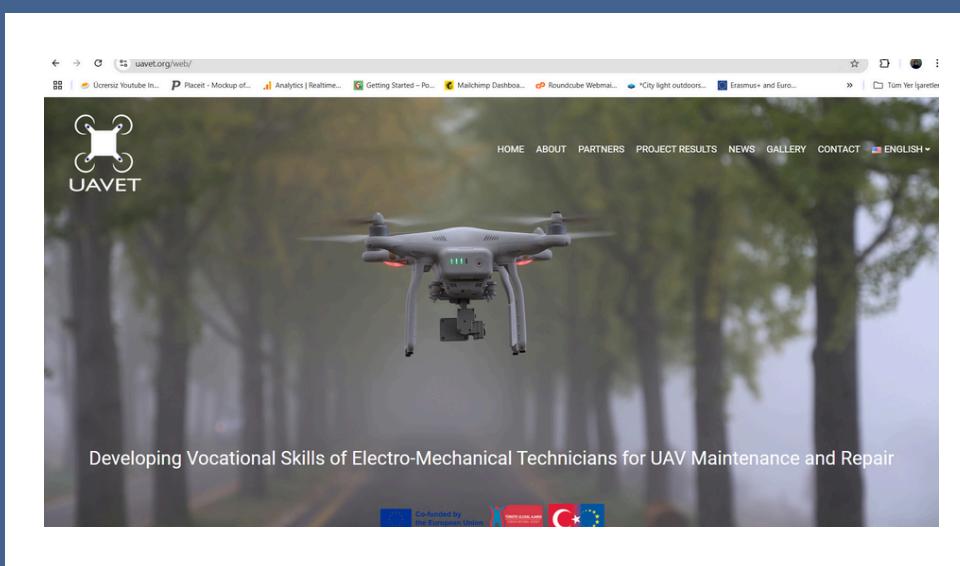

They closed the meeting after scheduling all ongoing and upcoming activities.
